Critical Maritime Routes Programme
Instrument contributing to Stability and Peace (IcSP)

EU CRIMARIO Maritime Information Sharing Manager Indian Ocean David Nattrass

dave.nattrass@crimario.eu

The beginning:

2013/14 CRIMARIO Identification Phase

2014 CRIMARIO Formulation Phase / Results presented to the region in Abu Dhabi

Jan 2015 CRIMARIO Implementation commences – 4 years

» Request for countries to assign designated focal points

Dec 2015 Introduced concept of IORIS

» Expert working group / Mombasa / Joint CRIMARIO/APU

Aim of Introducing IORIS

- To develop with the regional partners:
 - A Maritime Information Sharing Network for the region with Incident Management capability which will be;
 - Regionally Owned (membership defined by the region)
 - Regionally Managed
 - Regionally Located

Consultation

2016 – IORIS Technical Consultation

- Consultation with regional stakeholders through CRIMARIO focal points designated by countries
- Developed Technical specifications shared with stakeholders for feedback

Tender

2017 – Legal process for Tender

- Early 2017 Launched Part 1 Tender
 - Open Tender Distributed to regional contact points and TED (EU Tenders Electronic Daily) website.
- March July 2017
 - Tender contract validated by Expertise France Legal
 - Ownership Licensing IP (Intellectual Property)

Tender

- August 2017 Launched Part 2 Tender
 - Polymorph Ltd. Selected Contract signed October 17
- Consultation Meeting with Polymorph in Seychelles Nov 17
- Phase I Development Commenced end Nov 17

Indian Ocean Regional Information Sharing & Incident Management Network

Key Objectives:

- 1. Real time communications tool
- 2. Primarily Regional, also with National capability
- 3. Secure/encrypted environment to communicate and share information/data.
- 4. Build trust and confidence.
- Future interoperability RMIFC/CRFIM Fusion Module

IORIS - Multiple Collaboration Pages

- IORIS Multiple collaboration pages
- Regional Centres RCOC/CRCO and RMIFC/CRFIM dedicated pages
- Each country can create private National page (optional)
- Unlimited pages created as required for incidents or collaboration
- Collaboration page is secure and accessible only by permissions or invitation.

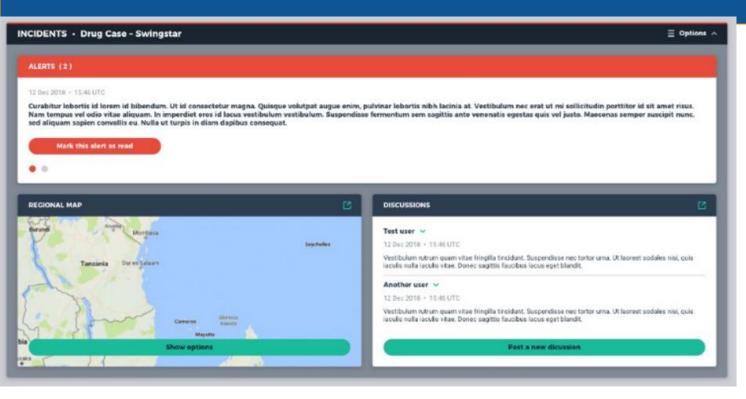

Incident management

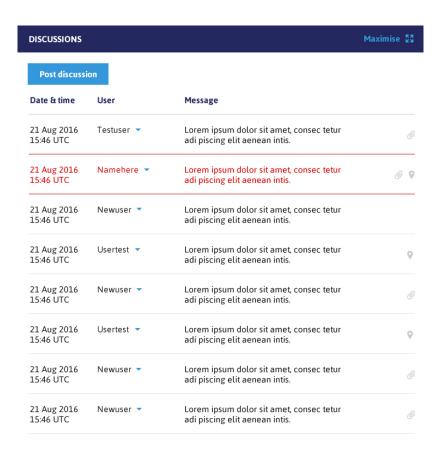

- New collaboration area for incidents
- Incident reports and follow up reports logging
- Associating files/documents/images with a specific incident
- Information can be automatically used when creating reports

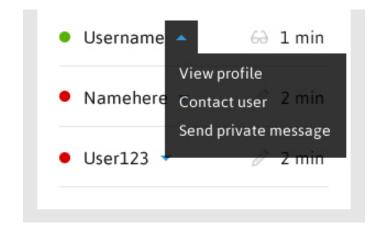

Group chat / Presence Awareness

- Real time Group chat
 - Public within IORIS / Private
- Map coordinates linked to mapping function
- User Presence Awareness

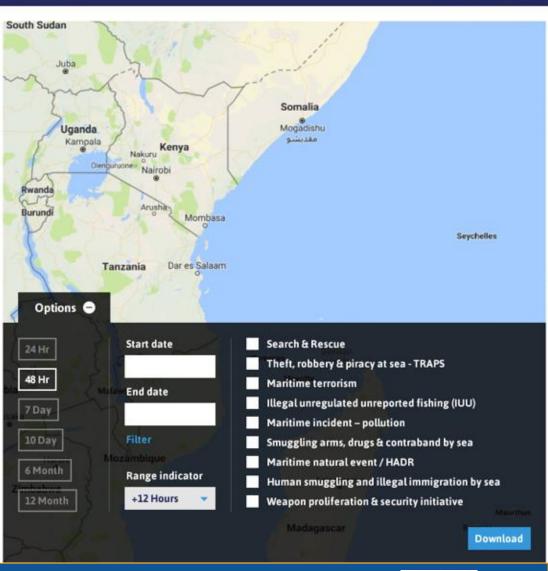

- Plot incidents / Polygons
- Filter by date
- Range
- Overlays (Nautical Charts)

Import / Export

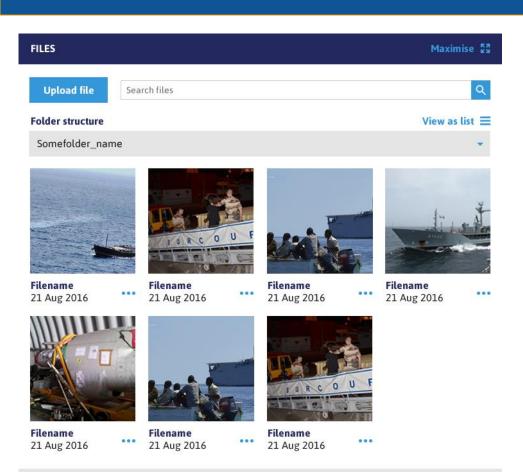

REGIONAL MAP

Show fullscreen

File sharing

 Upload images, word documents, PDF's etc.

Low Bandwidth and Training Platform

- A low Bandwidth version will also be developed with essential functionality only for:
 - Mobile users / Vessels / Slow internet

Duplicate Training Platform

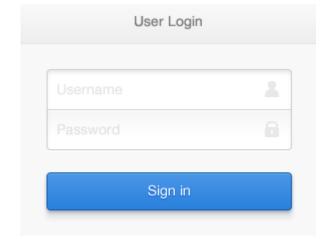

Security

- End to end encryption of all page content over the wire
- secure https://

- Username and password for all users
- Optional two-factor authentication
 - To authenticate mobile users for example
- IP Restriction white list of allowable IP addresses for an account
- Ability to store and share encrypted documents using industry standard ASES256 encryption

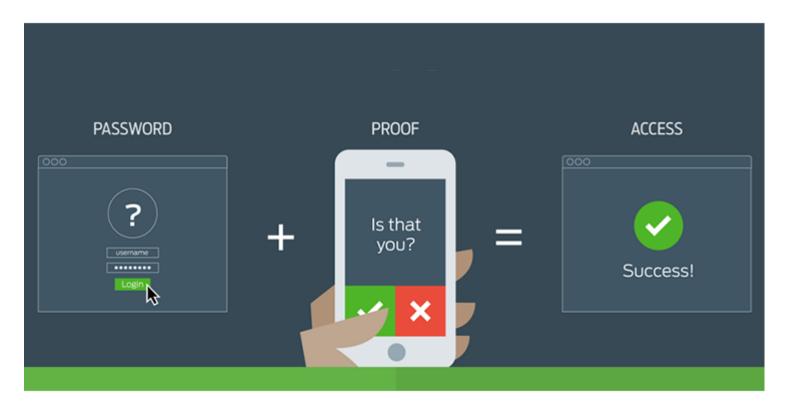

Two-factor authentication

Username / password AND a secondary device confirmation

Optional Encrypted file sharing

 Files are stored on the system and encrypted using a password

- The user who encrypted the file and who knows the password can:
 - Send a link to the file and
 - Separately send (via SMS or email) the password so the file can be unencrypted

Server Location/Security/Penetration Testing

New Microsoft Azure Cloud Hosting Facility will come online in South Africa in 2018

Trusted Cloud: Microsoft Azure Security, Privacy, and Compliance Microsoft Corporation

Perimeter

- Security staff around the clock
- Facility setback requirements
- Barriers
- Fencing

Buildings

- Alarms
- Security operations center
- Seismic bracing
- Security cameras

Computer room

- Two-factor access control: biometric and card readers
- Cameras
- Days of backup power

Full security penetration test will be conducted by 3rd Party Security Company.

Accounting / Auditing / Support

- System activity (including who accessed activity log)
- Administrators can set alarms for particular activities, or combination of activities
 - Some alarms will already be set within the system such as,
 i.e. failed login
- Azure 'insights' monitoring comprehensive analytics and error logs
- 24/7/365 Support

Keep it secure but practical......

Licensing and Intellectual Property

- IORIS includes:
- A perpetual usage license with no ongoing fees
- A copy of the software / source code
- Rights to modify the source code.
- Intellectual rights for the core software and initial development will remain with the developer
- Intellectual rights for future developments shall remain with the Customer / License Holder

Cost and Sustainability

- Long term sustainability essential
 - Maximum upfront costs supported by CRIMARIO
 - Software Development
 - Lifetime Licenses (IORIS / Mapping*)
 - Phase II Development 2018 (Possible development 2019)
 - Maintenance/support/hosting until April 2020
 - Minimise future costs (maintenance, support, hosting)
 - Estimated €25′000 €40′000 per annum

^{*}Mapping license up to 1000 users

Training

- Training
 - All Users and Administrators
 - Commencing in April 2018 with TtT in Seychelles
 - 3 Days up to 10 people
 - Training programme will continue thereafter for each country in both English and French supported by CRIMARIO

Implementation timeline

- Phase I in development now
- January March 2018
 - Testing
 - Penetration tests and rectification
- April 2018
 - Train the trainer
 - Software Acceptance Tests
 - Operational

Future Development

- Phase II -2018
 - After feedback and lessons learned from Phase I

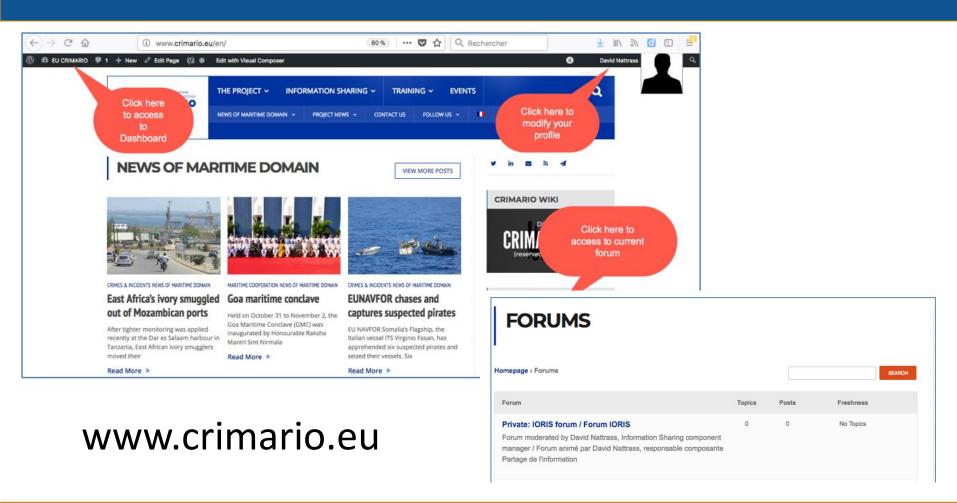

- Phase III 2019 (To be confirmed)
 - subject to project extension and available funds.
